LOUD! soundbath

with Delay change set to slide, change from 0.1, 0.2, 0.3, 0.4 in any order every 4'-6". Slightly adjust frequency throughout, staying in the low ranges.

At random points throughout, change delay change to JUMP and mash the delay time keyboard rows. Gestures should only last 2"-4" before returning to original instructions. Try not to do these at the same time as another performer. Overall sound should still be drone-y.
